

Abhi S Aji

Aspiring Software Engineering Intern

✉ abhisajiedenofficial@gmail.com  Abhi S Aji  abhi-s-aji

Profile

Computer Science undergraduate interested in backend development and software engineering. Building practical applications using Python, Django, databases, and modern development tools. Interested in contributing to real-world software projects while improving engineering skills.

LinkedIn: www.linkedin.com/in/abhi-s-aji-008445267 

Open to remote internships and international opportunities

Skills

Backend Development

- Python
- Django
- Django ORM
- REST APIs (Django REST Framework — Learning)
- PostgreSQL / MySQL
- Authentication

Data Structures & Algorithms

- Arrays and Linked Lists (Basic)
- Searching and Sorting Algorithms
- Problem-Solving Approach
- Basic Time Complexity Understanding

Professional Skills

- Analytical Thinking
- Team Collaboration
- Adaptability
- Quick Learner
- Time Management

Cybersecurity

- Basic Understanding of Network Security
- Awareness of Common Cyber Threats (Phishing, Malware)
- Fundamentals of Data Protection
- Basic Concepts of Encryption

Programming

- Object-Oriented Programming (OOP)
- Writing Clean and Structured Code

Tools & Version Control

- Git
- GitHub
- Linux
- VS Code
- Terminal

Linux

- Linux terminal usage
- Basic shell commands

Languages

- English
- Malayalam

Interests

- Cloud Computing
- Backend Development & Web Applications
- Problem Solving

Organisations

Innovation & Entrepreneurship Development Centre (IEDC), Lourdes Matha College of Science & Technology, Hackathon Participant

09/2024
Kerala, India

- Actively participated in a two-day Internal Smart India Hackathon, collaborating in a team environment to develop innovative problem-solving solutions.
- Contributed to idea generation, technical discussions, and solution design under time constraints, enhancing teamwork and analytical skills.

Projects

Appointment Management System [🔗](#), Django, PostgreSQL, HTML, CSS, JavaScript

Developed a full-stack appointment management web application using Django. Implemented user authentication, appointment scheduling, CRUD operations, and admin management features. Designed database models and backend logic using Django MVT architecture. Deployed the application on Railway for real-world accessibility.

Live Demo: <https://appointment-management-system-production-abhisaji.up.railway.app/> [🔗](#)

Desktop Shredder [🔗](#), High-Performance Physics Simulation Sandbox

High-performance physics sandbox built with Matter.js and HTML5 Canvas, featuring real-time rigid-body dynamics and procedural fragmentation. Optimized specifically for desktop computing environments.

Certificates

- Mastercard - Cybersecurity Job Simulation (Forage)
- AWS - Solutions Architecture Job Simulation (Forage)
- Tata - GenAI Powered Data Analytics Job Simulation (Forage)

Courses

B.Tech Computer Science Engineering, Lourdes Matha College of Science and Technology

09/2024 – Present
Kerala, India

- Currently pursuing a Bachelor of Technology in Computer Science and Software Engineering with a focus on programming fundamentals, data structures, algorithms, and software development principles.
- Actively building technical skills through coursework, self-learning, and practical simulations.

Currently learning

- Django REST Framework
- PostgreSQL
- Docker
- Linux administration

Digital 101 - 30 Hours, NASSCOM (IT-ITeS Sector Skills Council, Government of India)

04/2025
Online

- Successfully completed a 30-hour Digital Skills certification aligned with national competency standards developed by NASSCOM and approved by the Government of India.
- Gained foundational knowledge in digital literacy, technology fundamentals, and professional digital practices.

Programming Fundamentals using Python - Part 1, Infosys Springboard

11/2024

Online

- Completed a foundational course in Python programming covering core concepts such as variables, data types, control structures, loops, and basic problem-solving techniques.
- Strengthened understanding of logical thinking and structured programming using Python.
